

Quick Guide

EmergencyWipe for BlackBerry® Wireless Handheld

About

EmergencyWipe secures your private data from unauthorized access.

Installation

Extract all contents of the .zip file to a single directory and select the .alx in the "Application Loader" of your "BlackBerry Desktop Manager". Follow the instructions and the program will be installed on your BlackBerry®. A more detailed guide on third party program installation can be found [here](#).

What *EmergencyWipe* does

If you request a wipe of your confidential data *EmergencyWipe* will delete selected data sets from your BlackBerry®. To ensure you really want to wipe that data you need to **confirm** it **twice**. So you cannot delete that data accidentally. Only if you confirmed twice the data will be wiped.

Who should use *EmergencyWipe*

Everyone who cares about his data.

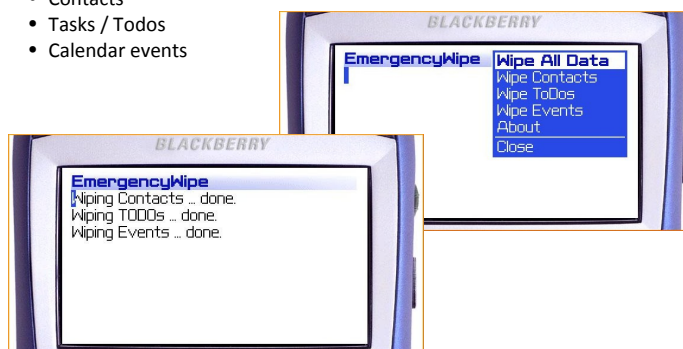

You might be in circumstances where it might be possible to loose control of your BlackBerry®. So it will be necessary to be sure no one can access your **confidential** data.

Protecting your private data from unauthorized access is one of the most important thing you should care about.

What will be wiped

There are currently three sets of data wiped:

- Contacts
- Tasks / Todos
- Calendar events

How to recover wiped data

1. Restore from desktop application:

If you are synchronizing your data using the „BlackBerry Desktop Manager“ with your favorite contact / email / task / calendar application you can easily recover your data. It is **very important** that you have selected „**Import**“ (right window) at **all** of your „Handheld Applications“ (left window).

2. Restore a backup:

If you have a recent backup of your BlackBerry® you can just restore the backup using your „BlackBerry Desktop Manager“. A more detailed guide on this can be found [here](#).

Requirements: BlackBerry® OS 4.1 or above

Purchase Guide

EmergencyWipe for BlackBerry® Wireless Handheld

Individuals
