

Quick Guide

EmergencyWipe for BlackBerry® Wireless Handheld

About

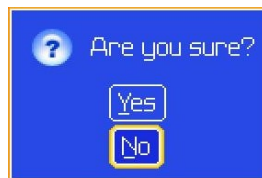

EmergencyWipe secures your private data from unauthorized access.

Installation

Extract all contents of the .zip file to a single directory and select the .alx in the "Application Loader" of your "BlackBerry Desktop Manager". Follow the instructions and the program will be installed on your BlackBerry®. A more detailed guide on third party program installation can be found [here](#).

What EmergencyWipe does

If you request a wipe of your confidential data EmergencyWipe will delete selected data sets from your BlackBerry®. To ensure you really want to wipe that data you need to **confirm** it **twice**. So you cannot delete that data accidentally. Only if you confirmed twice the data will be wiped.

Who should use EmergencyWipe

Everyone who cares about his data.

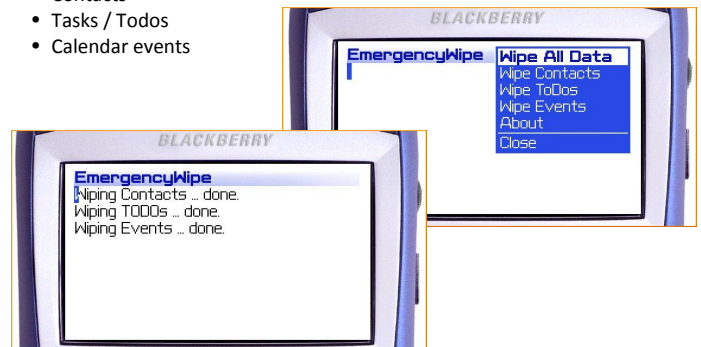

You might be in circumstances where it might be possible to loose control of your BlackBerry®. So it will be necessary to be sure no one can access your **confidential** data.

Protecting your private data from unauthorized access is one of the most important thing you should care about.

What will be wiped

There are currently three sets of data wiped:

- Contacts
- Tasks / Todos
- Calendar events

How to recover wiped data

1. Restore from desktop application:

If you are synchronizing your data using the „BlackBerry Desktop Manager“ with your favorite contact / email / task / calendar application you can easily recover your data. It is **very important** that you have selected „**Import**“ (right window) at **all** of your „Handheld Applications“ (left window).

2. Restore a backup:

If you have a recent backup of your BlackBerry® you can just restore the backup using your „BlackBerry Desktop Manager“. A more detailed guide on this can be found [here](#).

Requirements: BlackBerry® OS 4.1 or above
