

Quick Guide

SmartWiFi designed for BlackBerry® Wireless Handheld

About

WiFi® is the biggest consumer of power in your BlackBerry®. *SmartWiFi* will automatically turn your WiFi® module off when not needed and turns it back on when needed.

Installation

Extract all contents of the .zip file to a single directory and select the .apk in the "Application Loader" of your "BlackBerry Desktop Manager". Follow the instructions and the program will be installed on your BlackBerry®. A more detailed guide on third party program installation can be found here:

- [Install Applications using a Microsoft Windows Desktop](#)
- [Install Applications using a Mac OS X Desktop](#)

How to use SmartWiFi

When you are connected to a WiFi® network and would like to utilize *SmartWiFi*, open the application and click on "Add new WiFi location". This allows the program to identify and to remember information regarding your WiFi® connection.

The following information is shown when a new WiFi location is added.

- Name & Status of WiFi hotspot: Example – Work (Connected)
- IDs Assigned: Cell tower that the device is currently in, this information is added automatically as new cell towers are detected while still connected to the same WiFi hotspot.

When you are ready and have verified that the above information is correct, simply click on "Activate SmartWiFi" to begin!

Please note that the above steps are only required once for each new WiFi hotspot *SmartWiFi* runs in background while activated. You will see new cell IDs appear in the list during the day. *SmartWiFi* is smart enough to learn new network cells you are located in and remembers them.

There is nothing more to do. Just let *SmartWiFi* run in background.

How SmartWiFi Saves Battery

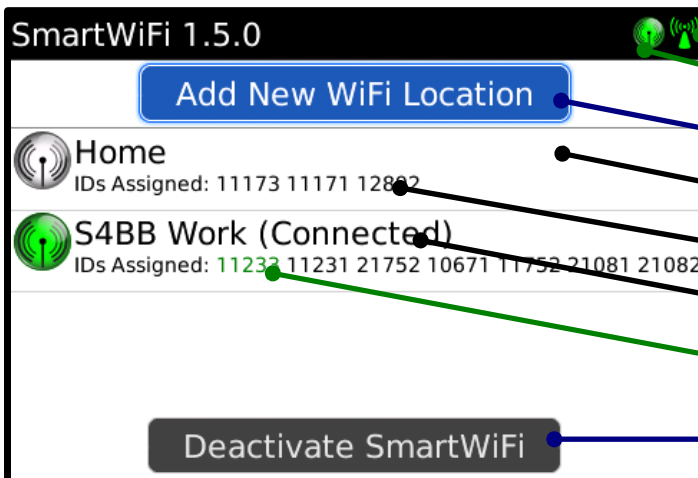

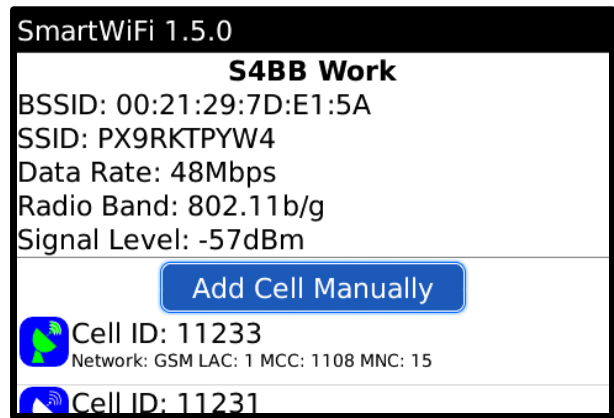

By remembering cell tower information, *SmartWiFi* detects when you leave your hotspot area (e.g. home or office) and WiFi® is turned off automatically. From now on you save a lot of battery power!

SmartWiFi Gets You Connected Again

By remembering cell tower information, *SmartWiFi* detects when you leave your hotspot area (e.g. home or office) and WiFi® is turned off automatically. From now on you save a lot of battery power!

How SmartWiFi Works

SmartWiFi leverages from the BlackBerry® always being connected to the network carrier. By combining cell tower and WiFi® hotspot information WiFi® is turned off when not needed and turned back on when needed. Because WiFi® is one of the biggest consumers of battery power (when searching for WiFi® networks) this has a tremendous effect on your battery life.

- WiFi® On/Off Indicator.
- SmartWiFi On/Off Indicator.
- Add a new WiFi® network here to get started.
- Your WiFi® network at home, remembered by *SmartWiFi*.
- Carrier cell IDs *SmartWiFi* identifies your location with.
- WiFi® network at work (where we are at the moment).
- Carrier cell we are currently connected to.
- On/Off button for *SmartWiFi*.

Requirements: BlackBerry® OS 4.3 or above
